۲		<p>با توجه به تصاویر به سوالات پاسخ دهید.</p>  <p style="text-align: right;">tall</p>	L
۴	<p style="text-align: center;">Reading</p> <p>با توجه به مفهوم جملات داده شده، گزینه صحیح را مشخص کنید.</p> <p>40) One way to protect wildlife is learning about endangered animals that live around us. a) All of the endangered animals live around us. b) Wildlife is about endangered animals. c) Learning about endangered animals is important.</p> <p>41) Planets are really amazing but not so much alike. a) Planets are different. b) Amazing planets don't like each other. c) All planets are the same.</p> <p>42) Bacteria aren't all bad; in fact you couldn't live without some bacteria. a) All bacteria are bad. b) You need all bacteria. c) Some bacteria are good for us.</p> <p>43) When the number of people on Earth increases, they need more places for living. a) People do not care about the Earth anymore. b) When the population grows, we don't have enough places for living. c) We cannot live on Earth because of people.</p>		M
۴	<p>متن زیر را به دقت بخوانید و به سوالات داده شده پاسخ دهید.</p> <p>The Earth is one of the eight planets that orbit round the Sun in what we call the Solar System. Solar is the adjective form Sun and comes from the Latin word for Sun-Sol.</p> <p>The Sun is 149.6 million kilometers from the Earth. The Sun is over one million times bigger than the Earth. Like all stars, the Sun is a great burning ball of gases. It is made of 92.1% hydrogen and 7.8% helium (helium is from the Greek word Helios, which mean Sun). The Sun gives life to the Earth and the Earth would have not life at all without the energy from the sun. The sun is only one of millions and millions of stars in the Milky Way Galaxy. We see it as a large round red ball only because we are much closer to the Sun than to any of the other stars. Other stars maybe larger, brighter or smaller than our Sun, but they are so far that we only see them as points of light in the night sky.</p> <p>❖ True/False</p> <p>44) According to the passage, the Sun is made of helium than of hydrogen. a) True b) False</p> <p>45) The Earth is less than 150 million kilometers from the sun. a) True b) False</p> <p>❖ Choose the best answer.</p> <p>46) We see other stars in form of light points because</p> <p>a) they are very far from us b) they are smaller than the Sun b) they are outside the Milky Way d) they are only round red balls</p>		N
