۴	The Earth is one of the eight planets that orbit round the Sun in what we call the Solar System. Solar is the adjective form Sun and comes from the Latin word for Sun-Sol.  The Sun is 149.6 million kilometers from the Earth. The Sun is over one million times bigger than the Earth. Like all stars, the Sun is a great burning ball of gases. It is made of 92.1% hydrogen and 7.8% helium (helium is from the Greek word Helios, which mean Sun). The Sun gives life to the Earth and the Earth would have not life at all without the energy from the sun. The Sun is only one of millions and millions of stars in the Milky Way Galaxy. We see it as a large round red ball only because we are much closer to the Sun than to any of the other stars. Other stars maybe larger, brighter or smaller than our Sun, but they are so far that we only see them as points of light in the night sky.			
	<ul> <li>True/False</li> <li>44) According to the passage, the Sun is made of more helium than of hydrogen. a) True b) False</li> <li>45) The Earth is less than 150 million kilometers from the sun.</li> <li>a) True b) False</li> </ul>			
		d) 10 y because closer than other stars to the Earth brighter than other stars		

متن زبر را به دقت بغوانيد و به سوالات داده شده باسخ دهيد.  One of the blood's most important jobs is to carry oxygen to each cell in the body. Without oxygen, the body can't stay alive. Blood transfusion is a way to help people who need blood. It is actually putting blood from one person's body into the body of someone else. A blood transfusion can help save thousands of lives each day!  Blood transfusions are possible because volunteers donate their blood. That makes it available at hospitals. The place that collects blood is called the blood bank. In a transfusion, a person might get whole blood – meaning they receive blood just as it came uto if the person who donated it. But usually someone needs only part of the blood. Blood has different parts, namely red blood cells, white blood cells, plasma and platelets. Each part has a special job to do. Hospitals need to be careful when they give a blood transfusion. People have different blood types: type A, B, AB and O. Giving someone the wrong blood type can create serious health problems.  * True/False  50) We all need a blood transfusion to stay alive.  a) True b) False  51) There is a special bank for keeping donated blood.  a) Choose the best answer.  52) In hospitals, doctors  a) need to donate blood  b) get donors' whole blood  c) need to know the patients' blood by give thousands of transfusions each day  53) People who are in serious need for blood  a) need to give a blood transfusion  b) need to pay a visit to the nearest blood bank  c) need to volunteer to donate blood  d) may need whole blood or just part of it  Writing  Writing  David is (56) (an university / a university) professor. He lives in (57) (Paris' paris) in a house near the Eiffel (58) (tower / Tower). He likes (59) (wolf / wolves). Last (60) (Sunday / sunday) he went to (61) (a zoo / zoo) to watch them. He sat on a (62) (wooden black / black wooden) bench. It was one of (63) (the best / worse) weekends he has ever had in his life.		<b>❖</b> Write a complete answer.				
One of the blood's most important jobs is to carry oxygen to each cell in the body. Without oxygen, the body can't stay alive. Blood transfusion is a way to help people who need blood. It is actually putting blood from one person's body into the body of someone else. A blood transfusion can help save thousands of fives each day!  Blood transfusions are possible because volunteers donate their blood. That makes it available at hospitals. The place that collects blood is called the blood bank. In a transfusion, a person might get whole blood - meaning they receive blood just as it came out of the person who donated it. But usually someone needs only part of the blood. Blood has different parts, namely red blood cells, white blood cells, plasma and platelets. Each part has a special job to do. Hospitals need to be careful when they give a blood transfusion.
